

# How to Install Lua on Linux

# How to Install Lua on Linux

On this lecture we are going to see how we can install Lua in Linux systems.

# How to Install Lua on Linux: Method 1

1 - We open the terminal in super user mode.

2 - Install libreadline-dev library:  
`sudo apt-get install libreadline-dev`

3 - Run curl command:  
`curl -R -O http://www.lua.org/ftp/lua-5.3.6.tar.gz`

4 - Go to lua folder and execute make

# How to Install Lua on Linux: Method 2

1 - `sudo apt update`

2 - `sudo apt install lua5.3`
