

How to Install Lua on MacOS

How to Install Lua on MacOS

On this lecture we are going to see how we can install Lua in MacOS.

How to Install Lua on MacOS

1 - We open the terminal in super user mode.

2 - Run curl command:

```
curl -R -O http://www.lua.org/ftp/lua-5.3.6.tar.gz
```

3 - Extract folder:

```
tar zxf lua-5.3.6.tar.gz
```

4 - Go to lua folder and execute make:

```
sudo make macosx install
```
